📍 Bengaluru, India

Software Developer focused on building scalable web applications and AI-powered systems, with experience across full-stack development, backend APIs, machine learning, and open-source collaboration.

Technical Skills

Languages: Java, Python, JavaScript, SQL, C

Frameworks & Libraries: FastAPI, Flask, React.js, Node.js, Express.js, Tailwind CSS

AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, Sentence Transformers

Databases: MongoDB, MySQL, SQLite, Firebase Firestore

Tools: Git, GitHub, Hugging Face, Postman, Jupyter Notebook, Google Colab, Vercel, VS Code

Core Concepts: DSA, OOP, DBMS, OS, CN, REST APIs, Machine Learning, System Design

Projects

Hiring Intelligence Engine (HIE)  | *FastAPI, Python, REST APIs, SQLite, Sentence Transformers*

- Architected an AI-powered candidate evaluation platform replacing keyword-based ATS with **semantic matching**, **explainable ranking**, and **behavioral intelligence**.
- With a multi-dimensional scoring engine integrating **Role DNA**, integrity validation, hiring risk analysis, and recruiter-centric decision support.
- A FastAPI-powered ranking pipeline capable of processing and re-ranking **100K candidate profiles** with millisecond-latency lookups using offline feature indexing.

PageRover – AI-Powered Browser Productivity Extension | *React, Vite, Tailwind CSS, Chrome Extension APIs, Google Gemini API*

- A modular AI-powered browser extension built using **React**, integrating Gemini API and Chrome Extension APIs for AI assistance, translation, accessibility, and productivity workflows.
- Unified **phishing detection**, **multilingual translation**, **text-to-speech**, **accessibility support**, **personalized layouts**, and **document export** as features within a single browser extension.

Salon Business Management System  | *MERN Stack, JWT, REST APIs*

- Developed a full-stack **MERN** business management platform with secure **JWT authentication** and role-based access control for customers and administrators.
- Supporting appointment scheduling, coupon management, advertisements, and administrative workflows with **REST APIs** to streamline day-to-day operations.
- Chose MERN architecture to streamline customer engagement and day-to-day business operations.

Open Source Experience

GirlScript Summer of Code (GSSoC'26) & Hacktoberfest '25

Oct 2025 – July 2026

Open Source Contributor

Remote

- Contributed to **TourEase** through carousel components, Bento-grid layouts, and landing-page refinements, and revamped **MindCare** with centralized state management and an accordion-based FAQ architecture.
- Collaborated across community-driven repositories through **GitHub workflows**, contributing to issue resolution, feature development, code reviews, and pull requests.

Education

JSS Academy of Technical Education (JSSATE)

July 2023 - May 2027

Bachelor of Engineering in Information Science and Engineering | GPA: 8.74

Bengaluru, Karnataka

Leadership & Achievements

- Earned Udemy certificate by **Krish Naik** on 'Complete Data Science, Machine learning, DL, NLP Bootcamp' .
- Contributed to the development of **JSSATEB Alumni Website**: jssatebalumni.com.
- Earned **NPTEL Elite Certification** in 'Introduction to Machine Learning' .
- Led **VERVE 2024** as **Vice Head**, driving a **180%** attendance increase; served as **Technical Core Member** at **GDG JSSATE-B**, conducting workshops and mentoring **400+ participants**.
