Academic Details

- Bachelor Of Engineering (B.E.)**
Information Science and Engineering
JSS Academy of Technical Education,
Bengaluru
– GPA: 8.74 / 10.0

Soft Skills

Analytical — Problem solving — Leadership — Adaptability

Technical Skills

- Programming Languages:**
Java, Python, C, JavaScript, TypeScript
- Web Development:**
HTML, CSS, React, Node, Express, MySQL, SQLite, MongoDB, TailwindCss, Flask
- Python libraries:**
Pandas, Numpy, Scikit-learn, Matplotlib
- Tools & Technologies:**
Git, GitHub, Postman, Jupyter Notebook, Vercel, Firebase, Google colab

Technical Experience

Open-Source Contribution Oct'25-
Present

Platform: GSSoC '26 , HacktoberFest '25

- TourEase** - Developed Carousel effect for feature section of Home page, Bento-Grid layout for feature page, Logical update in Date input
- Mind.Care** - Converted hard coded FAQ items to a data array structure, centralized state management for accordion open/close behavior animations.

Personal Details

Date of Birth: 14th May 2004
Languages Known: English, Kannada, Marathi, and Hindi.
Address: Bangalore ,Karnataka

Profile Summary

- A Web Developer focusing on Backend Developer and AI/ML systems, through building **browser extension**, **Salon business application**, **AI-integrated web applications**.
- Built using MERN stack, Flask, SQLite, and modern development technologies.
- Developed **TNBC detection model** resulting in **91.7%** accuracy involving **transfer learning**, real dataset pre-processing. And an **intelligent predictor** for Nationwide Power Grid system.
- Involved in project contributions, **GDG** community, and hackathons, with experience in collaborative development & real-world project execution.

Academic Projects

PowerPredict - AI-Powered Grid Management System

January 2026-May 2026

Tools: Flask(Python), React, ScikitLearn, CatBoost, Pandas, Numpy

A research prototype leveraging AI/ML for smart grid forecasting, power shortage management, carbon emission analysis, and renewable energy optimization.

Responsibilities:

- Developed an AI/ML-based electricity demand forecasting model using Kaggle datasets, achieving **91%** accuracy with an **RMSE of 0.058**.
- Added smart grid monitoring for shortage detection and load balancing.
- Implemented recovery forecasting and **grid alert** mechanisms.
- Integrated carbon emission estimation and renewable energy optimization.
- Designed **load balancing** and **disruption management** features to identify migration sources and notify stakeholders.

Full Stack Business Website

Jan 2026 - Feb 2026

Tools: ReactJS MongoDB , NodeJs, ExpressJS

This application was developed to tackle real-world management issues by improving coupon and appointment management system with functional user-authentication system for salon businesses.

Responsibilities:

- Built a full-stack MERN business application featuring secure JWT authentication, role-based management, and customer/admin portals.
- Engineered core business functionalities including appointment scheduling, coupon management, advertisement handling, and scalable RESTful APIs.

Typelt - Real-Time Multiplayer Typing Platform

May 2026 - June 2026

Tools: React, TypeScript, Firebase, Tailwind CSS

A real-time typing platform featuring multiplayer races, analytics dashboards, global leaderboards, and Firebase-backed persistence.

Built a custom typing engine with live WPM/accuracy tracking, focus mode, and smooth auto-scrolling. Implemented authentication, typing history, and real-time room synchronization using Firebase and Firestore. Designed scalable frontend architecture with React, TypeScript, reusable hooks, and modular components.

Academic Achievements

- Technical Core Member at GDG, JSSATEB: As part of the tech club, organized 6-day Tech event(SELENITE), mentored in **Google Cloud Study Jam**, and Gamified cybersecurity workshop with **400+** participants.
- Certified with NPTEL for *Introduction to Machine Learning*.
- Verve 2024: I was part of the event management team as Vice Head of Operations for the techno-cultural fest held in JSS Academy of Technical Education, Our team managed to see a growth of **180% attendance** during the event compared to former highest attendance.
